

Get Started With R: Download and Install R and RStudio

- Download R from the [Comprehensive R Archive Network \(CRAN\)](https://cran.r-project.org/) and install on your computer
- Download RStudio from <https://www.rstudio.com/> and install on your computer
- Launch R
- In the R Console, at the “>” prompt, type “2 + 2”
- Press the “Enter” key
- Observe that the result is “4”
- Exit R
 - From the pulldown menus File -> Exit
 - From the “>” prompt: type either “quit()” or “q()” and then press the “Enter” key
 - In the “Save workspace image?” dialog box, click “No”
- Launch RStudio
 - Notice that the “Console” window is the same console that you saw when you launched R
 - In the “Console” window, at the “>” prompt, type “2 + 2”
 - Press the “Enter” key
 - Observe that the result is “4”

Congratulations! You can now use RStudio to work with R. It's time to continue your R adventure.
